

## **Commerce Public Schools One to One Device**

Commerce Public School District's technology and electronic services exists for the purpose of enhancing the educational opportunities and achievement of students. It is not possible to cover every situation, and this document should not be considered all -inclusive. Rather, it expresses the District's philosophy and sets forth general principles that all users should apply when using these electronic services. Electronic services are assets provided through taxes and other funding. The District is the custodian of that property and must ensure use of electronic resources serves to facilitate and support the District's educational goals.

The device is legally the property of Commerce Public Schools. A damage waiver fee must be paid for each device before it is distributed to the student. Additional financial obligation will be assumed by student/parent/guardian if loss or damage is a result of handling, transport, storage, use, or if reporting of loss/damage is not in complete compliance with the Device User Agreement. Failure to meet financial obligation will result in repossession of the device. Once a student is no longer attending Commerce Public Schools, the device must be immediately returned. All devices must be returned no later than the last day of school for that student. Any device not returned by the designated deadline will be considered stolen property.

A copy of the full policy will be distributed to all high school students and additional copies may be obtained in the Commerce High School office.
